LONDON, EDINBURGH, AND DUBLIN

PHILOSOPHICAL MAGAZINE

AND

JOURNAL OF SCIENCE.

CONDUCTED BY

SIR OLIVER JOSEPH LODGE, D.Sc., LL.D., F.R.S.
SIR JOSEPH JOHN THOMSON, O.M., M.A., Sc.D., LL.D., F.R.S.
JOHN JOLY, M.A., D.Sc., F.R.S., F.G.S.
RICHARD TAUNTON FRANCIS

AND

WILLIAM FRANCIS, F.L.S.

"Nec aranearum sane textus ideo melior quia ex se fila gignunt, nec noster vilior quia ex alienis libamus ut apes." JUST. LIPS. *Polit.* lib. i. cap. 1. Not.

VOL. L.—SIXTH SERIES.

JULY—DECEMBER 1925.

LONDON:

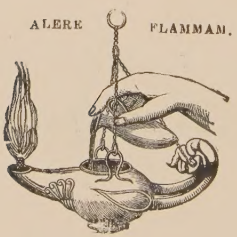
TAYLOR AND FRANCIS, RED LION COURT, FLEET STREET.

SOLD BY SMITH AND SON, GLASGOW;—HODGES, FIGGIS, AND CO., DUBLIN;—
AND VEUVE J. BOYVEAU, PARIS

"Meditationis est perscrutari occulta; contemplationis est admirari perspicua .... Admiratio generat quæstionem, quæstio investigationem, investigatio inventionem."—*Hugo de S. Victore.*

——"Cur spirent venti, cur terra dehiscat,
Cur mare turgescat, pelago cur tantus amaror.
Cur caput obscura Phœbus ferrugine condat,
Quid toties diros cogat flagrare cometas,
Quid pariat nubes, veniant cur fulmina cœlo.
Quo micet igne Iris, superos quis conciat orbes
Tam vario motu."

J. B. Pinelli ad Mazonium.



CONTENTS OF VOL. L.

(SIXTH SERIES).

NUMBER CCXCV.—JULY 1925.

Page

Mr. C. E. Wynn-Williams on a Method for Increasing the Working Range of an Oscillograph. (Plate I.) 1

Mr. E. J. Williams on the Effect of a Magnetic Field on the Electrical Resistance of Liquid Metals and Alloys 27

Mr. T. J. Jones on the Electrical Resistance of Mercury in Magnetic Fields 46

Dr. D. M. Wrinch on the Electric Capacity of Certain Solids of Revolution 60

Dr. J. A. Wilcken on Transient Electric Phenomena in a Non-Inductive Circuit 71

Dr. A. H. Davis on Reverberation Equations for Two Adjacent Rooms connected by an Incompletely Soundproof Partition 75

Dr. Norman Campbell on the Theory of the "Schrot-effect" 81

Prof. J. A. Crowther and Mr. R. J. Stephenson: A Study of the Electrolytic Interrupter. (Plate II.) 86

Prof. A. J. Sutton Pippard and Mr. J. F. Baker on an Experimental Verification of Castigliano's Principle of Least Work and of a Theorem relating to the Torsion of a Tubular Framework 97

Prof. O. Myagi on the Motion of an Air Bubble rising in Water. (Plate III.) 112

Mr. Sasi Bhushan Mali on a Method of Calculating the Vapour Pressure of a Solution with a Simple Solvent and a Non-Volatile Solute 141

Dr. Franklin A. Giacomini on the Temperature Dependency of the Molecular Heats of Gases, especially of Ammonia, Methane, and Hydrogen, at Low Temperatures 146

Prof. W. Arkadiew: Electric and Magnetic Spectroscopy 157

Prof. G. P. Thomson: A Physical Interpretation of Bohr's Stationary States 163

Prof. F. H. Newman on the Spectrum of Sodium at Low Voltages. (Plate IV.) 165

Mr. G. H. Dieke: Some Remarks on the Fulcher Hydrogen Bands. 173

Mr. James Robertson on the Motion of a Particle projected from a Point on the Earth's Surface—Variation in Gravity being taken into Account 180

Mr. H. G. Green on a Method of Measurement of Newton's Coefficient of Restitution, and the Law of Oblique Impact 187

Prof. T. R. Merton and Mr. J. G. Pilley on an Extension of the Negative Band Spectrum of Nitrogen 195

Prof. A. H. Gibson: The Flow of Water in a Corrugated Pipe 199

Mr. H. Glauert: The Determination of the Best Linear Relationship connecting any Number of Variables 205

Mr. R. L. Edwards: A further Note on the Forsythe Method of comparing Inductance and Capacity 207

Drs. J. Chadwick and P. H. Mercier on the Scattering of Beta-Rays 208

Mr. J. Dickinson on the Electrification of Gases by Surface Combustion 225

Dr. H. R. Robinson on X-Ray Terms and Intensities. (Plate V.) .. 241

Page

Mr. S. C. Roy on the Statistical Theory of Emission of Electrons from Hot Bodies 250
Mr. H. D. Griffith on the Laboratory Construction of Nernst Filaments 263
Dr. G. N. Antonoff on the Theory of Molecular Interaction in the Liquid State 265
Mr. D. R. Hartree on the Atomic Structure Factor in the Intensity of Reflexion of X-Rays by Crystals 289
Prof. W. L. Bragg on the Interpretation of Intensity Measurements in X-Ray Analysis of Crystal Structure 306
Messrs. Arne Westgren and Gösta Phragmén: X-Ray Analysis of Copper-Zinc, Silver-Zinc, and Gold-Zinc Alloys. (Plates VI.–XI.) 311
Messrs. J. J. Dowling and J. A. C. Teegan: Optical Interference Experiments with Multiple Sources. (Plate XII.) 341

NUMBER CCXCVI.—AUGUST.

Mr. E. O. Lawrence on the Photoelectric Effect in Potassium Vapour as a Function of the Frequency of the Light 345
Mr. C. N. Hinshelwood: Note on Mr. Garner's Paper on the Critical Increment of Chemical Reactions 360
Dr. C. P. Smyth on Refraction and Electron Constraint in Ions and Molecules 361
Dr. A. Bramley on Multiplet Structure 375
Prof. D. N. Mallik on Certain Postulates of the Quantum Theory.. 381
Prof. G. A. Schott on a New Discussion of Bucherer's Experiment. 389
Drs. L. A. Welo and O. Baudisch on the Two-Stage Transformation of Magnetite into Hematite 399
Prof. E. A. Milne on an Extension of the Theorem of the Virial ... 409
Mr. A. C. Menzies on Optical Screening-Constant Regularities 414
Prof. A. Ll. Hughes and Mr. F. E. Poindexter on Potassium as a Mercury-Vapour Trap 423
Mr. T. R. Vinycomb on a Method of Comparing Inductance and Capacity 439
Mr. R. T. Lattey on the Passage of an Alternating Current through Sulphuric Acid 444
Mr. S. R. Savur on the Stress-Optical Coefficients for Direct Tension and Pressure measured in the case of Glass 453
Prof. F. H. Newman on Low-Voltage Arcs in Rubidium and Cæsium Vapours 463
Mr. R. Hargreaves on a proposed Model for the Alpha Particle, and some Nuclear Series 470
Mr. W. H. George on the Partial Tones of the Struck String.—Part I. Experimental Investigation of the Fundamental. (Plates XIII.–XVI.) 491
Notices respecting New Books:—
Dr. L. Silberstein's The Theory of Relativity 499
Prof. A. Haas's Introduction to Theoretical Physics 500
The Principle of Relativity: A Collection of Original Memoirs on the Special and General Theory of Relativity 501
Max Born's Einstein's Theory of Relativity 502
Carl Benedicks's Space and Time 502
Mr. T. W. N. Sullivan's The History of Mathematics in Europe 503
Mr. L. Southern's Electricity and the Structure of Matter 503
Intelligence and Miscellaneous Articles:—
The Constant N of Avogadro, by Dr. P. Lecomte du Noüy.... 504

NUMBER CCXCVII.—SEPTEMBER.

Page
Dr. B. Ray on the Effect of Chemical Constitution on the X-Ray Spectrum of Sulphur. (Plate XVII.) 505
Prof. K. T. Compton: Note on the Production of Atomic Nitrogen and its Arc Spectrum 512
Mr. C. F. Elam on the Orientation of Crystals in Metal Test-Pieces subjected to Small Strains followed by Heat-Treatment 517
Dr. C. D. Ellis and Mr. W. A. Wooster on the Heating Effect of the γ-Rays of Radium B and Radium C 521
Dr. H. L. Brose on the Motions of Electrons in Oxygen 536
Prof. E. A. Milne on Saha's Ionization Formula, and on the Theoretical Value of the Photo-electric Absorption Coefficient 547
Dr. A. H. Bucherer: Reply to Mr. U. Doi's "New Discussion of Bucherer's Experiment" 551
Messrs. L. F. G. Simmons and F. C. Johansen on the Transmission of Air-Waves through Pipes 553
Prof. W. B. Morton and Miss F. M. Chambers on the Combined Combined Vibration of a Bar and String, and the "Wolf-Note" of a Stringed Instrument 570
Mr. E. J. Williams on the Electrical Conductivity of some Dilute Liquid Amalgams 589
Mr. G. H. Briggs on the Electric Charge carried by Thorium X and Emanation Recoil Atoms in Gases 600
Mr. V. N. Solovieff on Vibrations of two Pendulums connected by a Spring. (Plates XVIII.–XX.) 612
Drs. W. J. H. Moll and H. C. Burger: A New Vacuum Thermo-element 618
Drs. W. J. H. Moll and H. C. Burger on the Thermo-Relay 624
Drs. W. J. H. Moll and H. Burger on the Sensitivity of a Galvanometer and its Amplification 626
Dr. A. B. Wood on the Piezo-Electric Oscillograph. (Plates XXI. & XXII.) 631
Dr. H. Daecke on a Mathematical Statistical Investigation concerning Sub-electrons 637
Prof. A. L. Nayaran and Mr. K. R. Rao on Absorption of Light by Vapours of Pb, Sn, Bi, Sb, and Mg. (Plate XXIII.) 645
Dr. J. W. Nicholson on the General Nature of Band Spectra 650
Notices respecting New Books:—
Tables Annuelles de Constantes et Données Numériques de Chemie, de Physique, et de Technologie 663
Proceedings of Learned Societies:—
Geological Society:—Dr. L. W. Collet on the Latest Ideas on the Formation of the Alpine Range 663

NUMBER CCXCVIII.—OCTOBER.

Mr. J. P. Andrews on Relations between Young's Modulus and other Physical Quantities 665
Mr. L. Soep on the Surface-Tension Crystal *v.* Saturated Solution 675
Dr. L. Silberstein on Projective Geometry of Galileian Space-Time 681
Mr. K. S. Krishnan on the Molecular Scattering of Light in Liquids. 697
Dr. C. P. Smyth: Note to "Refraction and Electron Constraint in Ions and Molecules" 715
Mr. G. Subrahmaniam on Variation of Logarithmic Decrement with Amplitude and Viscosity of Certain Metals.—II. 716

Page

Messrs. S. R. Pike and G. Nonhebel: Note on the Theory of Interionic Attraction in Strong Electrolytes 723

Messrs. G. Nonhebel and H. Hartley on the Activity Coefficients and Transport Number of Solutions of Hydrogen Chloride in Methyl Alcohol 729

Prof. E. H. Lange on Regeneration in Tuned Three-element Vacuum-tube Circuits 750

Prof. R. W. Wood on Fine Structure, Absorption, and Zeeman Effect of the 2536 Mercury Line. (Plate XXIV.) 761

Prof. R. W. Wood on Optical Excitation of the Mercury Spectrum, with Controlled Orbital Transfers of Electrons. (Plate XXV.) .. 774

Prof. F. H. Newman on the Spectrum of Potassium at Low Voltages. (Plate XXVI.) 796

Prof. A. S. Eddington on the Derivation of Planck's Law from Einstein's Equation 803

Dr. C. Norman Campbell on the Theory of the Schrot Effect 808

Prof. A. Press on Maxwell's Electromagnetic Æther and the Michelson-Morley Experiment 809

Prof. C. V. Raman on the Nature of the Disturbance in the Second Medium in Total Reflexion. (Plate XXVII.) 812

Dr. H. Jeffreys on the Circulation Theory of Aeroplane Lift 815

Mr. W. C. McQuarrie: A Note on the Spectra of Silicon and Aluminium. (Plate XXVIII.) 819

Prof. S. Chapman and Mr. A. E. Ludlam: A Note on the Vibration of the CO_3-ion 822

Prof. V. A. Bailey on the Attachment of Electrons to Gas Molecules. 825

Prof. G. Cook on the Collapse of Short Thin Tubes by External Pressure 844

Dr. Naoto Kameyama on Ionic Equilibria across Semi-Permeable Membranes 849

Miss K. Yardley on Three Examples illustrating X-Ray Methods of supplementing and correcting Crystallographic Data 864

Mr. J. D. Main Smith on the Distribution of Electrons in Atoms .. 878

Mr. E. J. Bowen: A Note on the Photoactivation of Chlorine 879

Notices respecting New Books:—

Dr. I. B. Hart's The Mechanical Investigations of Leonardo da Vinci 880

Dr. W. N. Bond's An Introduction to Fluid Motion 881

Mr. G. Birtwistle's The Principles of Thermodynamics 881

Mr. F. E. Ross's The Physics of the Developed Photographic Image 882

Prof. S. B. McLaren's Scientific Papers, mainly on Hydrodynamics and Natural Radiation 883

Mr. W. C. A. Whetham's The Recent Development of Physical Science 883

Prof. Max Planck's A Survey of Physics 881

Mr. F. S. Carey and Dr. J. Proudman's The Elements of Mechanics 884

Mr. F. B. Pidduck's A Treatise on Electricity 885

Dr. H. Lamb's Statics, including Hydrodynamics and the Elements of the Theory of Elasticity 885

Proceedings of the Geological Society:—

Dr. A. Heard on the Petrology of the District between Nevin and Clynnogfawr (Carnarvonshire) 886

The President's Anniversary Address 887

Prof. A. H. Cox on the Geology of Cader Idris (Merionethshire). 887

NUMBER CCXCIX.—NOVEMBER.

Page

Prof. Sir E. Rutherford and Dr. J. Chadwick: Scattering of α-particles by Atomic Nuclei and the Law of Force 889

Mr. J. L. Synge on an Alternative Treatment of Fermat's Principle for a Stationary Gravitational Field 913

Messrs. J. Taylor and L. A. Sayce: A Study of a Certain Type of Air Discharge-Tube at the Critical Resistance for Flashing 916

Messrs. A. E. Ruark and R. L. Chenault on Fine Structures of Spectrum Lines 937

Prof. E. H. Barton and Dr. H. M. Browning on Sound-Changes analysed by Records.—I. Trumpet and Cornet. (Plates XXIX.–XXXI.) 957

Prof. L. R. Wilberforce on Diffraction by Line Screens. (Plate XXXII.) 967

Dr. A. Ferguson and Mr. I. Vogel on the Calculations of the Equivalent Conductivity of Strong Electrolytes at Infinite Dilution. Part I.—Aqueous Solutions 971

Mr. R. E. Clay on the Generation of Oscillations by a Discharge-Tube 985

Dr. G. Glockler on Predicted Ionization-Potentials of Niton and Hydrofluoric Acid 997

Mr. C. W. Heaps on Thermoelectric Power and the Hall Coefficient. 1001

Mr. J. Forrest on Magnetic Quality in Crystals. 1009

Dr. A. J. Bradley on the Allotropy of Manganese. (Plate XXXIII.) 1018

Mr. W. E. Garner on the Critical Increment of Chemical Reactions. 1031

Mr. M. S. Ahmed on the Torsion of Hollow Oval Prisms 1033

Dr. D. M. Wrinch on Laplace's Equation and the Inversion of Coordinates 1049

Dr. W. N. Bond on Viscous Flow through Wide-Angled Cones .. 1058

Prof. J. A. Crowther and Mr. R. J. Stephenson on Some Electrode Phenomena in Electrolysis 1066

Mr. R. H. Fowler: A Note on the Summation Rules for the Intensities of Spectral Lines 1079

Mr. C. N. H. Lock on the System of Vortices generated by a Circular Cylinder in Steady Motion through a Fluid..... 1083

Mrs. R. V. Jolowicz (*née* Wagner): Experiments on the Absorption of the Balmer Lines in Hydrogen..... 1089

Mr. W. R. Dean on Secondary Effects of Shear on an Elastic Body. 1097

Prof. C. G. Barkla and Dr. S. R. Khastgir on the J Phenomenon in X-Rays.—Part II. Application to Scattered X-Rays..... 1115

Messrs. C. N. Hinshelwood and C. W. Thornton on the Energy Distribution Law appropriate to the Theory of Chemical Reaction Velocity 1135

Mr. C. R. Bury on the Fulcher Lines in the Hydrogen Spectrum.. 1139

Prof. B. Iliin on Adsorption Forces and their Electrical Nature. —II. The Electrical Moment of the Adsorbed Molecule and the Superficial Energy of the Adsorbent 1144

Dr. S. C. Bradford: Contribution to the Kinetic Theory of Vaporization.—II. 1147

Mr. P. A. Taylor on the Vibration of the CO_3 Group 1158

Mr. J. H. Jones on the Influence of the Surrounding Medium on Frictional Electricity 1160

Notices respecting New Books:—

Messrs. L. Tuttle and J. Satterly's The Theory of Measurements. 1177

Mr. A. Eagles's A Practical Treatise on Fourier's Theorem and Harmonic Analysis for Physicists and Engineers 1178

Prof. H. Lamb's The Dynamical Theory of Sound 1179

Proceedings of the Geological Society:—

Prof. A. H. Cox on the Dissection of Pitching Folds 1180

Page

NUMBER CCC.—DECEMBER.

Sir J. J. Thomson on the Structure of Light 1181
Prof. M. E. Hufford on the Discharge of Electricity between Equipotential Plates. (Plate XXXIV.) 1197
Mr. W. G. Plummer on the Crystalline Structure of Hexachlorobenzene and Hexabromobenzene. (Plate XXXV.) 1214
Prof. E. F. Burton and Miss B. M. Reid: Determination of Size of Colloidal Particles by means of Alternating Electric Fields.. 1221
Mr. D. Meksyn on the Metric of the Four-dimensional Space-time Continuum 1227
Dr. W. J. Walker on Specific Heat Variations in Relation to the Dynamic Action of Gases and their Equations of State. (Plate XXXVI.) 1244
Mr. H. Carrington on the Frequencies of Vibrations of Flat Circular Plates fixed at the Circumference 1261
Drs. R. Azuma and N. Kameyama on Potential Difference and Equilibrium across a Semi-permeable Collodion Membrane in the Case of Sodium Chloride and Congo Red 1264
Prof. F. H. Newman on the Spectrum of Rubidium at Low Voltages. (Plate XXXVII.) 1276
Mr. S. R. Savur on a New Optical Phenomenon shown by Biaxal Crystals 1282
Notices respecting New Books:—
Mr. F. J. M. Stratton's Astronomical Physics 1295
Dr. J. G. Leathem's Elements of the Mathematical Theory of Limits 1296
Messrs. Hart and Smith's The Principles of Sound Signalling. 1296
Proceedings of the Geological Society:—
Messrs. C. B. Brown and R. A. Baldry on the Clay Pebble-Bed of Ancon (Ecuador) 1297
Mr. J. I. Platt on the Pre-Cambrian Volcanic Rocks of the Malvern Inlier 1298
Index 1299

PLATES.

I. Illustrative of Mr. C. E. Wynn-Williams's Paper on a Method for Increasing the Working Range of an Oscillograph.
II. Illustrative of Prof. J. A. Crowther and Mr. R. J. Stephenson's Paper on a Study of the Electrolytic Interrupter.
III. Illustrative of Prof. O. Myagi's Paper on the Motion of an Air Bubble rising in Water.
IV. Illustrative of Prof. F. H. Newman's Paper on the Spectrum of Sodium at Low Voltages.
V. Illustrative of Dr. H. R. Robinson's Paper on X-Ray Terms and Intensities.
VI.–XI. Illustrative of Messrs. A. Westgren and G. Phragmén's Paper on X-Ray Analysis of Copper-Zinc, Silver-Zinc, and Gold-Zinc Alloys.
XII. Illustrative of Mr. J. J. Dowling and J. A. C. Teegan's Paper on Optical Interference Experiments with Multiple Sources.
XIII.–XVI. Illustrative of Mr. W. H. George's Paper on the Partial Tones of the Struck String.—Part I. Experimental Investigation of the Fundamental.
XVII. Illustrative of Dr. B Ray's Paper on the Effect of Chemical Constitution on the X-Ray Spectrum of Sulphur.
XVIII.–XX. Illustrative of Mr. V. N. Solovieff's Paper on Vibrations of Two Pendulums connected by a Spring.
XXI. & XXII. Illustrative of Dr. A. B. Wood's Paper on the Piezo-Electric Oscillograph.
XXIII. Illustrative of Prof. A. L. Narayan and Mr. K. R. Rao's Paper on Absorption of Light by Vapours of Pb, Sn, Bi, and Mg.
XXIV. Illustrative of Prof. R. W. Wood's Paper on Fine Structure, Absorption, and Zeeman Effect of the 2536 Mercury Line.
XXV. Illustrative of Prof. R. W. Wood's Paper on Optical Excitation of the Mercury Spectrum, with Controlled Orbital Transfers of Electrons.
XXVI. Illustrative of Prof. F. H. Newman's Paper on the Spectrum of Potassium at Low Voltages.
XXVII. Illustrative of Prof. C. V. Raman's Paper on the Nature of the Disturbance in the Second Medium in Total Reflexion.
XXVIII. Illustrative of Mr. W. C. McQuarrie's Paper on the Spectra of Silicon and Aluminium.
XXIX.–XXXI. Illustrative of Prof. E. H. Barton and Dr. H. M. Browning's Paper on Sound-Changes analysed by Records.—I. Trumpet and Cornet.
XXXII. Illustrative or Mr. L. R. Wilberforce's Paper on Diffraction by Line Screens.
XXXIII. Illustrative of Dr. A. J. Bradley's Paper on the Allotropy of Manganese.
XXXIV. Illustrative of Prof. M. E. Hufford's Paper on the Discharge of Electricity between Equipotential Plates.
XXXV. Illustrative of Mr. W. C. Plummer's Paper on the Crystalline Structure of Hexachlorobenzene and Hexabromobenzene.
XXXVI. Illustrative of Mr. W. J. Walker's Paper on Specific Heat Variations in relation to the Dynamic Action of Gases and their Equations of State.
XXXVII. Illustrative of Prof. F. H. Newman's Paper on the Spectrum of Rubidium at Low Voltages.

ERRATA.

Page 177, vol. 49, line 12, for ct_0 read vt_0.

„ „ „ „ 17, for $0<x<ct_0$ read $0<x<vt_0$.

The formula on page 872, vol. 50, line 28 should read:—

$$N^2=4\sin\tfrac{1}{2}(\alpha+\beta+\gamma)\sin\tfrac{1}{2}(-\alpha+\beta+\gamma)$$
$$\sin\tfrac{1}{2}(\alpha-\beta+\gamma)\sin\tfrac{1}{2}(\alpha+\beta-\gamma).$$
